

PRODUCT SPECIFICATION

AQUAMAX™ C909 PVCO
Gasketed Integral Bell

Our AquaMax™ C909 Gasketed Integral Bell (IB) PVCO Pipe product line is manufactured to meet the needs of modern municipal water, wastewater, and reclaimed water systems. With top quality raw materials and modern processing technology, our C909 pipe meets all industry standards in addition to our own rigorous quality control requirements.

Compared to C900 pipe, C909 pipe meets the same performance standard with a thinner wall, resulting in approximately 40% less weight and approximately 10% more flow area (when PC 235 is compared to DR18).

Our C909 pipe utilizes Anger-Lock™-style gaskets throughout the entire product offering to create a leak-free joint.
